Sequence 2, Application US/09065872

Patent No. 6162629

GENERAL INFORMATION:
APPLICANT: Balance 2, Andrew D

APPLICANT: Hand, Andrew D

APPLICANT: Hand, Libua
APPLICANT: Hand, Libua
APPLICANT: Hand, Libua
APPLICANT: Hand, Libua
APPLICANT: Sheliga, Theodore A

TITLE OF INVENTION: Improved Methods for Processing Activated Protein C
FILE REPERENCE: aPC process patent
CURRENT APPLICATION NUMBER: 195/09/065,872

CURRENT FILING DATE: 1998-04-24

EARLIER PRILING DATE: 1997-04-28

NUMBER OF SEQ ID NOS: 2
                       270
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    402 GlyGlyProMetValAlaSerPheHisGlyThrTrpPheLeuValGlyLeuValSerTrp 421
